... is waiting for you with Leica Silverline. An expression of individuality, character and distinction. Inspired by a passion for excellent design, these optical instruments perform to the highest standards. They are crafted with an unmistakable design using first-class materials and in superb quality, to deliver impeccable technological and functional performance. Whenever you wish to see more, to be closer to the action: with Silverline, you will experience unforgettable moments. Immediate, intense and rewarding.

From its very foundation, Leica has stood for pure aesthetics and modern timelessness. And that remains so today. Everyone who owns a Leica continually discovers fascinating new experiences: to see things that make each moment into something special.

The secret in our success lies in our attention to detail. All our products are individually handmade with meticulous care. Every set of Leica binoculars or monoculars are guaranteed to perform with outstanding precision and reliability, even under extreme conditions. That means you can always depend on your Leica. Wherever you go. Whatever you do.

Your Leica Sport Optics

At home in the world's greatest cities...

... you know their most beautiful buildings and interesting places. But have you seen their most fascinating sights?

Enjoy a completely new perspective on the world around you with your Silverline binoculars. You will be captivated. Be prepared to experience new impressions and new encounters.

Immerse yourself in the exclusive optical performance of these precision instruments and take the time to discover the extraordinary. Silverline will enhance your senses and accelerate your pulse. Light and extremely precise, these binoculars and monoculars expand the limits of natural perception. So you can see details that would otherwise remain hidden. Explore the Leica Silverline and experience moments that you will remember forever.

SILVERLINE

Experience new horizons. Silverline 8x42+10x42.

Wind speed: 8 knots. Is the world's oldest international sporting trophy about to change hands again? The race is long. Twenty miles. This is the moment the contenders must prove themselves. Which has the best design? Which has the superior build? Who will be fastest? Who will be the first to catch the wind?

Whatever outdoor activity you undertake, you can count on the Silverline 8x42 and 10x42 binoculars. They are not only robust, they are also ideal for use in conditions of low visibility and poor light. Thanks to their exceptional image brightness, these high-end binoculars let you detect an approaching storm front, for example, far on the horizon. So you can react instantly.

Their compact housing contains remarkably precise technology. The large focus wheel is highly practical and easy to use. Ergonomically designed to sit comfortably in your hand, it lets you set the focus quickly and accurately in every situation. With their short focusing range – a little more than one rotation of the focus wheel – Silverline binoculars can be precisely focused in seconds.

LEICA SILVERLINE 8x42

The essential details

- the perfect all-rounder: high-contrast viewing in daylight and twilight, good detail resolution
- optimum ratio of magnification to field of view, brightness, and weight
- wide 389 ft / 130 m field of view

LEICA SILVERLINE 10x42

The essential details

- high detail resolution, thanks to 10x magnification
- ideal for daylight viewing at greater distances
- broad 336 ft / 112m field of view

The benefits at a glance

- timeless and enduring
- easy and comfortable handling
- secure, comfortable grip
- excellent light sensitivity in difficult viewing conditions

Expands the senses. Silverline 8x20+10x25.

Quiet please! The second serve lands over the line, the break is complete. At the oldest and most prestigious tennis tournament in the world, the audience is spellbound. With the Silverline 8x20 or 10x25 binoculars, you are in the middle of the action. You can observe the concentration on the players' faces, study their expressions, and sense their determination to win.

Each of our high-precision compact binoculars delivers impressive performance. Our specially developed HDC™ multi lens coating ensures excellent colour fidelity and high contrast. Thanks to the breath-taking clarity of the image, you know immediately whether the ball was outside the line or not. And best of all: their neatly compact design means that you can slip them into your jacket pocket and carry them with you wherever you go – making them a practical and immensely helpful companion for every outing.

LEICA SILVERLINE 8 x 20

The essential details

- weigh just 230 g
- wide field of view
- steady image

LEICA SILVERLINE 10 x 25

The essential details

- weigh just 255 g
- 10 x magnification delivers highly detailed images

The benefits at a glance

- the benchmark standard for compact binoculars
- brilliant, high-contrast, and pin-sharp viewing
- wide field of view, sharp from edge to edge
- extremely good stray light suppression
- nitrogen filling prevents internal fogging
- waterproof to 16.5 ft / 5 m
- eyepieces particularly friendly even for wearers of glasses

In every aspect, a masterpiece. Silverline 8x20 Mono.

Sitting inside the packed auditorium, the rich sound of the orchestra surrounds you completely. The power of the brass section gives you goosebumps. Mesmerised, you watch the conductor, sensing the passion and concentration in every single movement.

The Silverline 8x20 Mono reveals every detail of the performance. It lets you see things that would otherwise go unnoticed. Despite its impressive abilities, it is small and light – and it fits comfortably in any pocket. Having experienced the fascinating insights offered by this stylish instrument, you'll never want to go to the theatre or a concert without it.

Beautifully engineered, this monocular features 8-times magnification, bringing you so close that you can make out the pattern of wood grain on the violins. It also offers a close-up lens for detailed observation of objects at close range (25 to 30 cm).

LEICA SILVERLINE 8x20 MONO

The benefits at a glance

- handy, versatile, and weighs in at only 4 oz / 112 g
- close-up lens enables macroeffect
- nitrogen filling prevents fogging
- with water- and dirt-repellent AquaDura™ coating
- waterproof to 16.5 ft / 5 m
- high quality case for storage and protection

The fascination with perfect pictures. Leica Cameras.

LEICA S2

With the Leica S2, Leica has created a new benchmark for professional digital photography. The Leica S System breaks down the barriers between 35 mm and medium-format photography. For the first time, the S2 combines the handling and size of a 35-mm camera with image quality that sets new standards in medium-format photography – to deliver supreme image quality and maximum creative potential.

LEICA M9

The latest landmark in the professional Leica rangefinder system. The Leica M9 offers the unmatched combination of a high-performance full-format 24x36 mm sensor with rangefinder technology refined and optimised over more than half a century. It is a digital system camera placed at the absolute zenith of modern technology, delivering uncompromising image quality to satisfy the demands of the most sophisticated creative photographers.

LEICA X1

This elegant member of the Leica camera family is reminiscent of the classic M system – both in design and performance. Equipped with a CMOS sensor equal in size to that of many DSLR cameras, and one of the best Leica lenses, the X1 fears no comparison with its larger stablemates in terms of image quality. As an option to its manual functions, it provides automatic features such as autofocus, making it a convenient companion for every discerning camera user.

LEICA D-LUX 5

The Leica D-Lux 5 is the ideal camera when you're open to the inspiration of extraordinary images. Compact, intuitively easy to use and equipped with a high speed Leica Summicron lens that boasts a focusing range of 24-90 mm, it is an ideal all-round performer: from architectural studies to available-light photography. Its manual controls and wide range of accessories give you even greater creative freedom: for inspiring photographs with outstanding image quality.

LEICA V-LUX 2

The Leica V-Lux 2 is the perfect companion for globetrotters who want to see more of the world. It offers excellent performance in a compact format. Its super-zoom lens delivers a focusing range of 25-600 mm, making the V-Lux 2 extremely flexible and eliminating the need to carry and change lenses. Thanks to its full HD video function and lightning fast serial-photo speed of 11 shots per second, it lets you capture even the finest detail. The ideal instrument for modern-day explorers.
