

MINOX EASY SLIDER BINOCULAR STRAP

In cooperation with ARTISAN & ARTIST, the Japanese premium manufacturer of camera cases and straps, MINOX has developed a new and innovative strap for binoculars – the Easy Slider. The patented system featured in this practical strap makes it possible to adjust and fix the length of the strap using just one finger and have the binoculars ready for action with one single move.

The extra wide nylon strap (3.5 cm) of the Easy Slider guarantees high wearing comfort,

especially in the neck area. The length can be individually adjusted between 90 and 135 cm to match the user's body size, and the strap can also be worn diagonally, or in front of the body. Due to the easy-sliding nylon material the Easy Slider can be quickly brought into the desired position ensuring more freedom of movement than conventional binocular straps.

Products from ARTISAN & ARTIST are manufactured using highest quality materials according to methods that are centuries old.

The products are distinguished by their craftsmanship and meticulous attention to detail, and in particular by their practicality and comfort.

PRODUCT FEATURES / TECHNICAL DATA:

- Patented binocular harness strap in an innovative design
- Adjustment and fixing of the length using just one finger
- Eliminates swinging action when worn on your side
- Binoculars ready for action in an instant
- Adjustable length from 90 to 135 cm
